

Where should we expand?

Executive overview of global market attractiveness and strategic insights

TOP MARKET

USA

Highest overall market attractiveness score

TOP GROWTH REGION

Eastern & Southern Asia

Strongest growth-to-scale potential

HIGH VALUE MARKETS

~ 5%

Of countries offer high purchasing power and stability

EMERGING MARKETS

~ 47%

Of countries have high population & growth potential

STRATEGIC TAKEAWAYS

PREMIUIM EXPANSION

Developed economies are the most reliable expansion targets due to high purchasing power, stable governance & predictable demand patterns.

GROWTH OPPORTUNITY

Eastern and Southeast Asia represent the strongest balance of scale and growth potential, despite moderate operational complexity.

HIDDEN RISK

Language diversity is a significant operational cost driver and often outweighs population size in market feasibility.

KEY FINDING

Population alone is a weak predictor of market attractiveness.

GLOBAL MARKET OVERVIEW

Where are the biggest opportunities?

Market attractiveness based on population scale, purchasing power, and development indicators.

MARKET ATTRACTIVENESS OVERVIEW

Market Attractiveness Score

- High Opportunity (0.75-1)
- Medium Opportunity (0.50-0.74)
- Small Opportunity (0-0.49)

- > 500M
- 100-500M
- 25-100M
- > 25M

Market attractiveness score combines population, GNP per capita and development indicators

TOP OPPORTUNITY MARKETS

Rank	Market
1	United States
2	Japan
3	Switzerland
4	Germany
5	France
6	Norway
7	United Kingdom
8	Denmark
9	Italy
10	Sweden
11	Luxembourg

Opportunity is concentrated in **North America, Western Europe** and **developed Asian economies** despite significant population concentration elsewhere.

KEY INSIGHT

High attractiveness markets share a common pattern: strong purchasing power, economic maturity, and manageable operational complexity. Large population alone does not guarantee expansion suitability.

What types of markets are we dealing with?

Countries are grouped into strategic market segments based on attractiveness, scale, and purchasing power.

MARKET LANDSCAPE

MARKET SEGMENT DISTRIBUTION

KEY INSIGHT

Most countries belong to Emerging and Mid-Tier segments, while only a small number combine both scale and purchasing power.

How difficult are these markets to operate in?

Markets are evaluated using opportunity and operational complexity to identify realistic expansion targets.

OPPORTUNITY VS COMPLEXITY MATRIX

KEY COMEXLITY DRIVERS

Language Diversity
Number of (official and non-official) languages spoken.

Capital Concentration
How centralized economic activity is.

Population Density
Infrastructure pressure.

Operational Accessibility
Logistics and ease of doing business.

AVERAGE LANGUAGES
PER COUNTRY

4.43

TOP COMPLEX MARKET

China

(12 languages)

MOST ACCESSIBLE REGION

North
America

MOST CENTRALIZED MARKET

Monaco

(Top 1% in capital concentration)

KEY INSIGHT

Some of the most attractive markets are also among the most operationally complex. Expansion success depends on balancing opportunity with operational readiness.

What changes if our strategy changes?

Adjust weighting priorities to explore different expansion strategies.

Top Market: Switcherland

KEY INSIGHT

Market attractiveness depends on business objectives. Different strategies produce different expansion priorities.

What should we do?

Strategic recommendations for international expansion.

EXPAND NOW (Developed Markets)

USA
Large market, High purchasing power, Manageable complexity

Japan
Strong economic stability, Predictable demand.

Switzerland
Premium market, Strong stability, High-value customers.

Germany
Largest balanced economy in Europe, Strong purchasing power

GROWTH MARKETS (Prioritize for scale)

China
Huge scale and long-term potential but high operational complexity.

India
High growth potential with improving economic fundamentals.

Southeast Asia
Best balance of scale, growth and operational feasibility.

LONG-TERM WATCHLIST

Africa
Strong demographic growth, but weaker current purchasing power and infrastructure.

CAUTION MARKETS (Monitor or Avoid)

- Markets with:
- Low purchasing power
 - High language fragmentation
 - Low operational accessibility
 - Political/economic instability

FINAL RECOMMENDATION

A two-speed expansion strategy is recommended: prioritize developed economies for immediate returns while establishing long-term positions in emerging Asian markets. Market selection should balance opportunity and operational complexity rather than relying on population size alone.
